What experience and skills make you the best candidate for this office? (Max. 750 characters)

City governance is a function of economics, law and the Applied and Social Sciences, including but not limited to architecture, agriculture, built environment, ecology, waste mitigation and management, energy, information technology, sociology, psychology and mental health, medicine (research, practice and holistic), and climatology. In that I am a doctoral level Scientist (in the Applied Sciences - wetland bioremediation/environment sustainability) AND Economist, and now a recent Juris Doctorate pursuing license to practice law (although of course such license is not required to serve in public office nor necessary to employ my legal acumen for the benefit of Charlotte), I am, then, the most logical and therefore BEST candidate for Mayor

Identify your top three (3) issues that you wish to address during your tenure in office and rank them in order of priority. (Max. 750 characters)

Because this seems to be a common question, I've spoken out about this a lot. Apt and competent candidates should NOT run on "top priorities" or "issues" except where of course a candidate's priority should always be equity and democratic governance because such is the very purpose of our elections. Any purpose opposite thereto demonstrates a self-serving motive, and should alarm voters. That said, and incorporating the colloquial nature of the question, I strongly believe that high ethical rigor, equity, collaborative leadership are always amongst my core values as to public service. Upholding and even enforcing these core values allows for ease in ensuring apt and competent governance for ALL Charlotteans.

How will you address the top issue once you are in office? (Max. 750 characters)

To address declining community oneness, equity, and valuation for our city, I have proposed a co-mayoral council which shall empower diverse groups in Charlotte. I will meet with them regularly to survey concerns and needs, and compile a report that I regularly present to the council to aid in decision making

Additional Comments (Max. 1000 characters)

I always appreciate the opportunity to answer questions from PACs and nonprofit political orgs, and even more so appreciate that PACs and nonprofit political orgs facilitate accurate and objective awareness regarding candidates in each election cycle. Nonetheless, the questions and my answers do not demonstrate the fullness of who I am. For that reason, I have kept meticulous archives of my current and past answers to questionnaires, and video recordings of my participation in past and current candidates forum, and I kindly invite you to view them all at my campaign website. This way - learning more about me is even more efficient and convenient for you. I'm also always available to answer any questions you may still have after viewing all that I've shared on my website (which arguably is incomparably a lot more transparency than you've ever seen). Thank you again for the opportunity to engage your membership body and those within the reach of your voter guide.
